Date: 05/01/24

To whom it may concern:

Section 1502 of the Dodd-Frank Wall Street Reform and Consumer Protection Act requires certain publicly traded corporations to report the use of “Conflict Minerals” in the manufacture of their products. Generally, the term Conflict Minerals collectively refers to cassiterite, columbite-tantalite, gold, wolframite, or their derivatives, including tantalum, tin and tungsten, which originate from the Democratic Republic of the Congo or specified adjoining countries.

Klein Tools does not intentionally add Conflict Minerals to any of its products, and the Klein Tools Code of Conduct, which applies to all Klein Tools suppliers, prohibits the use of Conflict Minerals in Klein Tools products. However, as a privately held corporation, Klein Tools is not subject to Conflict Minerals rules and reporting requirements, and does not currently have a program in place to audit all of its products and all of its suppliers.

We will continue to work with our key suppliers to ensure that we are able to identify the use of Conflict Minerals in our supply chain, and the representations made in this compliance statement remain accurate. To that end, we reserve the right to amend this statement at any time based on subsequent developments or information.

Should you have any questions or concerns regarding this statement, please do not hesitate to contact us.

Regards,

Russell A. Goldmann II
Director, Product Safety & Compliance
