Eaton Crouse-Hinds series EMT set screw type coupling

Representative product	467 (Reference) Product Category: EMT Set screw type Coupling (Others)
Description of the product	The Eaton Crouse-Hinds series EMT set screw type coupling is a conduit fitting specifically designed to join two lengths of Electrical Metallic Tubing (EMT) in a straight run. It is constructed from zinc-plated steel, providing excellent durability and corrosion resistance for long-term use. The coupling features four tightening screws that ensure a secure mechanical connection and maintain electrical continuity between the conduits. With a trade size of 3 inches, this fitting is suitable for heavy-duty commercial and industrial electrical installations, offering reliable performance and compliance with standard electrical codes.
Homogeneous Environmental Families Covered	The PEP concerns following product offerings from Eaton Crouse-Hinds series EMT set screw type couplings as mentioned below: 460 ,461, 462, 463, 464, 465, 466, 468, 469.
Functional unit	“To couple a two lengths of Electrical Metallic Tubing (EMT) conduit in a straight run over a period of 20 years”.
Company information	1700 Blue Hills Dr NE, Roanoke, VA 24012 Email: productstewardship-es@eaton.com

Constituent Materials			
Reference product mass	1.12E+00 Kg (With packaging)		
Category PEP Material	**Material constituent**	**Mass (kg)**	**% Contribution**
Metals	Stainless Steel	6.35E-01	56.9%
Other	Cardboard	4.78E-01	42.8%
Metals	Zinc	3.18E-03	0.3%
Total		1.12E+00	100.0%

Substance Assessment
The representative product is compliant with the EU-RoHS Directive (2011/65/EU) without any exemption

Additional Environmental Information	
Manufacturing	The reference product is manufactured at the direct source supplier. Eaton is committed to reducing its overall manufacturing footprint by leveraging innovative technologies and sustainable practices to minimize energy use, emissions, materials, and waste.
Distribution	Eaton is committed to minimizing weight and volume of product and packaging with focus to optimize transport efficiency.
Installation	The installation process does not require any energy consumption and there is no waste other than the obsolete product packaging generated during this step.
Use	The product does not require energy consumption during operation.
End of life	The Product is having 100% incineration without energy recovery

Environmental Impacts	
The calculation of the environmental impacts is the result of the Product's Life Cycle Analysis in accordance with ISO 14040/44, covering the entire lifecycle, i.e., "Cradle-to-Grave" including the following life cycle phases: production, distribution, installation, use and end of life. System modelling was carried out using the commercial LCA software EIME v6.3.2-4 with database version (CODDE-2025-04) Indicators Set: PEF EF 3.1 (Compliance: PEP ed.4, EN15804+A2) v2.0	
Manufacturing Phase	The reference product is manufactured at the direct source supplier plant in India. Energy model used: India
Distribution Phase	Distribution of the product in its packaging from the Eaton's last logistics platform to the installation place in America, United States is considered as per PCR rules.
Installation Phase	Product is installed in North America, United States. Installation of product and treatment of packaging waste are considered in this phase. There is no energy consumption for reference product.
Use Phase	Reference lifetime: 20 Years Usage profile: No Energy required in use phase.
End of life Phase	The product is assumed to be disposed of with 100% incineration without energy recovery.

Environmental Impact Indicators: Mandatory

Mandatory environmental impact indicators	Units	Sum	A1-A3 - Manufacturing	A4 - Distribution	A5 - Installation	B1-B7 - Use	C1-C4 - End of life
Climate change - total	kg CO2 eq.	9.68E+00	8.19E+00	2.50E-01	9.10E-01	0.00E+00	3.25E-01
