Carbide-Tipped Hole Cutters

Klein Tools introduces a new line of Carbide-Tipped Hole Cutters designed to give you fast, clean cuts in stainless steel, mild steel, sheet metal, iron plate, copper and brass up to 3/16" (5 mm) thick. These carbide-tipped hole cutters cut through metal up to 1100% faster than traditional punch and die sets. The innovative pilot drill design is smooth starting, giving you greater control as you cut through metal. A flange integrated into the design of the cutter prevents it from penetrating all the way through sheet metal. Our fine grain carbide tips are designed for long life, even in material as tough as stainless steel. Klein Tools quality, long lasting products save time and effort on the job.

Carbide tips for cutting in material as tough as stainless steel

Split point pilot drill prevents fit walking

Smooth starting pilot drill bit for control

Integrated flange prevents the operator from drilling beyond the sheet metal

Ejection spring for easy slug removal
