Single Circuit Track System and Accessories

ELCO TRACK

provides versatility for every lighting need. Low profile decorator finishes, push in connectors, economy, all combine to make single-circuit miniature track perfect for residental and commercial use.

SIZE

Track is only 5/8" deep and 1 3/8" wide.

FINISHES

Track is available in the three finishes: white, black and brush nickel.

CONNECTORS

Connectors simply push into the ends of the track, eliminating splicing L/T/X and the flexible connector allow track to be assembled in almost any pattern.

GROUNDING

To ensure safe operation the entire track system is fully polarized and grounded. Grounding is accomplished automatically by a seperate solid copper ground conductor in the track. The ground conductor maintains continuity to the building's grounding system through the ground contact fingers in each of the connectors.

SPECIFICATIONS

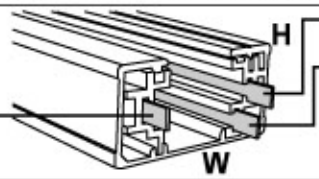

The structural channel is extruded aluminum with .060" nominal wall thickness. Conductors are solid copper buss bars encased in rigid extruded PVC insulators.

TRACK DIMENSIONS

B = Black, **N** = Nickel, **W** = White
