Model: JXL-COB04-S15W-5CCT

Wattage: 15W

Luminous Flux: 1200LM

Input Voltage: AC100-130V

Color Temperature: 5CCT Tunable (2700K/ 3000K/ 3500K/ 4000K/ 5000K)

CRI: >90

Size: 122*122*64mm

Cutout Size: Ø108mm

Description

This 4 inch square 5CCT tunable deep anti-glare downlight is IC-rated and air-tight, with no housing required. It comes with an external driver in a junction box for better heat dissipation. The uniform round cutout – shared by both square and round trims, speeds up installation and cuts labor costs, a real advantage for contractors on large projects. Rated for damp locations, it handles humid environments like bathrooms, covered patios, or basements with ease. Whether it's for hotels, offices, retail stores, schools, hospitals, or residential renovations, this downlight delivers comfortable, glare-free illumination that protects eyes and elevates any space.

Features

Dimmable with High CRI

Smoothly 10% - 100% dimming. With CRI 90+, it shows accurate colors for better visual comfort.

Uniform Round Cutout

Round and square downlights share one round cutout, cutting installation time and cost.

Interchangeable Trim (2" & 4")

Trim in various colors and styles, DIY to change.

Anti-glare Design

This fixture reduces eye strain and delivers soft uniform lighting.

Optional Beam Angle

24°/ 36° available, for accent spotlights or wide area ambient lighting to fit different application scenarios.

Deep Anti-glare

● This deep anti-glare design hides the light source deep inside, so the light hits the floor, not the eyes.

● It's the kind of comfortable, shadow-free lighting that makes people feel at ease in any space – whether it's a hotel lobby, an office, or a living room.

Uniform Round Cutout

● Whether you choose square or round trim, the drilled round-hole design stays perfectly uniform across both shapes.

● This small detail makes a big difference - faster installs, less hassle on site, and lower labor costs. Small change, big savings, especially on large projects.

Change Trim in Seconds

● No tools, no screws, no hassle. Our reflector cup uses a simple clip design that lets you pop it in or take it out with just your fingers.

● That means faster maintenance, quicker on-site adjustments, and no special training needed for your installers.

Optional Beam Angle

● Whether you need a tight spotlight for highlighting specific architectural details or a wider wash for general areas, this downlight adapts perfectly to your project.

● Plus, its CRI>90 rating ensures true, vibrant color rendering, making illuminated spaces look natural and welcoming.
