Description

This 4 inch LED slim panel light features an ultra slim, low profile design that fits seamlessly into tight ceiling spaces, delivering uniform, flicker-free illumination with quick to install. Equipped with smart group control function, you can take full command of your property's lighting. It also features Smart Color RGBCW, offering 16 million colors at your fingertips, from soothing warm whites to vibrant party hues and everything in between. Ideal for residential kitchens, bathrooms, hallways, and bedrooms, as well as commercial spaces including hotels, restaurants, retail stores, and modern office buildings.

Features

16 Million Colors

Features a RGBW chipset for superior color mixing and a dedicated white.

Music Snyc

The smart recessed lighting can change the color with the beat of the music or the sound of the game.

Voice Control

Pair it instantly via WiFi or Bluetooth, and enjoy hands-free control with Alexa and Google Assistant.

IC Rated

This canless LED recessed light is IC rated, which is permitted to be in contact with insulations in ceilings.

Smart Color RGBCW

● Meet the smart panel light that does it all, from cozy warm whites to vibrant colors, it's energy-smart, budget-friendly, and built to impress.

● Pair it instantly via WiFi or Bluetooth, and enjoy hands-free control with Alexa and Google Assistant. No hub, no hassle, just reliable performance.

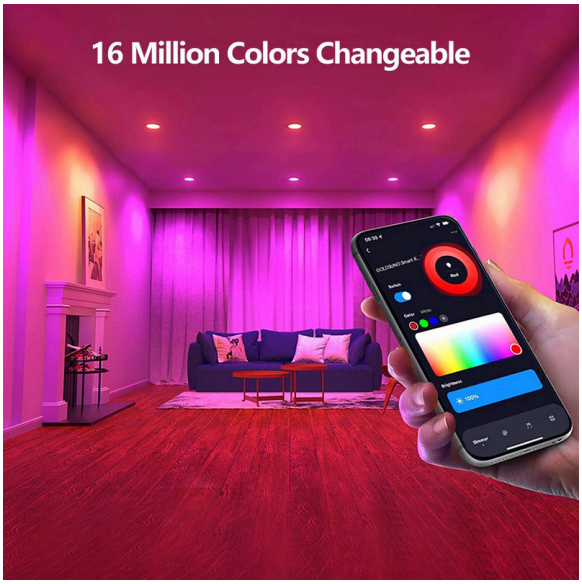

Qualified Performance

● It is built for spaces where every inch counts. Perfect for low-ceiling installations, it slides right in without the hassle.

● The durable aluminum body keeps it cool and long-lasting, while the sponge gasket ensures a tight seal against dust and moisture.

● With high-quality snap springs and a UL-certified wire terminal, installation is quick, secure, and worry-free.

Smart Light, Smart Life

● With 16 million colors at your fingertips, this smart light turns any room into a personalized experience.

● Whether it's cozy movie nights, festive gatherings, or everyday lighting, the options are limitless.

Voice Control

● Imagine walking into a room and simply saying "Alexa, turn the light to warm white" or "Hey Google, dim to 50%" , and it happens instantly.

● TCompatible with both Amazon Alexa and Google Assistant, it takes voice commands effortlessly, making lighting as simple as speaking.

● Give you the future of lighting – today.

Group Control

● With our Group Setting feature, you can easily adjust the colors and brightness of different rooms at the same time.

● It saves time, reduces labor costs, and gives your guests or tenants a premium, customizable experience.
